LaTeX example

Hello

<div align="right">world</div>

same
<div align="right">line</div>

(1) words can be:

- small (footnote size) [1]

- big (Large)

(2) I can create hyperlinks to websites like Google or to other locations in my document (e.g., "more on that topic later").

(3) I use `array` for stuff like this:

$$
\begin{array}{rcl}
\tan\left(-\dfrac{11\pi}{6}\right) & = & \tan\dfrac{\pi}{6} \quad \text{since} -\dfrac{11\pi}{6} \text{ and } \dfrac{\pi}{6} \text{ are coterminal} \\[2ex]
 & = & \dfrac{\sin\dfrac{\pi}{6}}{\cos\dfrac{\pi}{6}} \\[3ex]
 & = & \dfrac{\dfrac{1}{2}}{\dfrac{\sqrt{3}}{2}} \\[3ex]
 & = & \dfrac{1}{\sqrt{3}} \quad \text{since multiplying by } \dfrac{2}{2} \text{ is legal}
\end{array}
$$

(4) and `tabular` for stuff like this:

Lorem	ipsum	dolor
§	$\mathbb{Z}$	$

(5) second   first

(6)

---

[1] speaking of footnotes...

Here are those details I promised earlier.
